

Casings:

11 ounce Mesh top with 18oz vinyl-coated woven polyester produces maximum durability and a puncture resistance of 390psi. Unlike vinyl-coated nylon, this fabric will hold its shape under all weather conditions. Base casings are interchangeable for even wear and long life.

Foam:

Select density polyurethane foam creates durability. Cross tunnel construction facilitates a smoother landing.

HANDLES

Made of strong 2" webbing with reinforced stitching and an additional "X" stitching for incomparable strength.

Hardware and More:

Heavy duty plastic zippers are corrosion resistant for smooth operation in all conditions. All zippers are sewn in to folded vinyl
Color Option: Blue (others available upon request)
Side Release Buckles to connect pit pieces
Zippers in back
Industrial grade hook and loop fastening system used for its sheer strength.
